**MADE IN
BRITAIN**

BH50

The **DARAY**® BH50 is a highly efficient LED bed-head/patient light complementing the aesthetics of contemporary ward fittings.

The BH50 uses a 5W LED lamp which is equivalent to a 60W incandescent light, giving over 30,000 hours of use. The beam is directional with no light escaping from the back of the head, minimising light pollution for neighbouring beds, making it perfect for reading. Wall mounted as standard, with bespoke mounting options available.

Desk mount option shown

- 'Daylight' LED module
- Low total cost of ownership
- Over 30,000 hours of use
- 5W lamp equivalent to 60W incandescent
- 4,500k colour temperature
- Directional beam with no 'light waste'
- Ideal for reading
- Compatible with patient call systems

Environmentally friendly - our green promise

- NviroLED™ has an intense clear white light beam equivalent to 60W incandescent whilst consuming only 5W.
- 30,000 hours of life from the LED bulb.
- No more bulbs to change - reduces waste by 95% over the light's lifetime.
- No halogen, mercury, cadmium, lead or CFCs. No chemicals harmful to the environment.
- Hard-wearing and fully recyclable when the light comes to the end of its life.

Products Available
